Naturally Preserving the Benefits of Omega-3

Omega-3 oils are valued for **their cardiovascular and cognitive health benefits**, but their high unsaturation makes them **highly susceptible to lipid peroxidation and oxidative degradation**, compromising potency and stability. To protect these sensitive oils, fast-acting, **synergistic natural antioxidants are essential**.

At Btsa, we offer Nutrabiol® XT, a natural antioxidant solution that combines tocopherols with green tea extract to provide highly effective protection against oxidation in Omega-3 nutraceutical formulations.

Nutrabiol® XT

reliable & versatile performance

- Optimized for **highly unsaturated oils such as Omega-3**
- Improves **final product stability**
- Powerful, **naturally derived synergistic blend**
- Available from different sources: **soy and sunflower**
