Nutrabiol®: Protection for Sensitive Ingredients

Nutraceutical formulations are rich in highly valuable active ingredients like Omega-3, Vitamin D, and Coenzyme Q10. These actives are extremely sensitive to oxidation, which can reduce their efficacy. Incorporating antioxidant-based formulation strategies is essential to preserve their stability and benefits.

At BTSA, we offer NUTRABIOL®, a range of natural mixed tocopherols, specially designed to protect sensitive nutraceutical actives from degradation. By integrating NUTRABIOL® into your formulations, you can ensure maximum stability, extend shelf life, and maintain the full potency of your products.

Nutrabiol®

reliable & versatile performance

- Maintains **full ingredient efficacy**
- **Protects actives** from oxidation
- Ensures consumer **product reliability**
- Extends formulation **shelf-life**
- Supports **consistent product performance**
