Nutrabiol® Tocotrienols for Brain Health Support

Brain health is a critical area in modern nutrition, especially as **aging** and **oxidative stress** accelerate cognitive decline. Tocotrienols play an important role in **protecting brain cells from oxidative damage** and supporting neuronal integrity. Their **neuroprotective** and **anti-inflammatory** properties make them highly relevant for long-term cognitive health.

At BTSA, we offer Nutrabiol® Tocotrienols, a tocotrienol-rich fraction based solution designed for advanced nutraceutical formulations. It provides a highly bioavailable source of vitamin E compounds that support brain health through antioxidant and neuroprotective mechanisms, helping protect neurons from oxidative stress and supporting cognitive function over time.

Nutrabiol® Tocotrienols

reliable & versatile performance

- Neuronal oxidative protection
- Supports cognitive function
- Maintains membrane integrity
- Promotes brain resilience
- High bioavailability tocotrienols
