oxabiol.

Natural Protection for BARF Diets

BARF diets are rich in **animal fats and minimally processed ingredients**, making them **highly prone to oxidation**. In **frozen, freeze-dried, or dehydrated formats**, maintaining fat stability is essential to preserve freshness and nutritional quality.

At BTSA, we offer OXABIOL®, a natural tocopherol-based antioxidant solution designed to protect high-fat BARF formulations from oxidative degradation. OXABIOL® helps maintain lipid stability across raw frozen, freeze-dried, and dehydrated formats, supporting premium pet nutrition with reliable, clean-label antioxidant protection.

Oxabiol®

reliable & versatile performance

- Natural **lipid oxidation control**
- **Ideal for BARF diets** products
- High-fat **formula protection**
- **Clean-label** tocopherol solution
- Preserves **freshness and flavor**
