Grain-Free & High-Fat Pet Food Diets

Grain-free and high-fat pet food formulations have rapidly grown in the premium segment, driven by pet humanization and demand for high-meat, low-carbohydrate recipes. These diets rely heavily on fats and oils, increasing the risk of lipid oxidation during processing and shelf life. Effective antioxidant protection is therefore essential to ensure product quality and stability.

At BTSA, we offer Oxabiol®, a natural antioxidant solution based on mixed tocopherols designed to protect grain-free and high-fat pet food formulations. Oxabiol® helps control lipid oxidation, preserve sensitive fatty acids, maintain palatability, and support clean label and premium product positioning.

Oxabiol®

reliable & versatile performance

- Natural **lipid protection**
- **Clean label** solution
- **High-fat stability**
- **Palatability** preservation
- **Shelf life** extension
