

tocobiol.

Natural Antioxidant Solution for Plant-Based Food

The **plant-based** market is booming, driven by consumer interest in **healthier** and more sustainable foods. At the same time, the **clean label trend** pushes for simple, natural ingredients. This creates challenges in formulation, especially **protecting oils and fats** from oxidation **without using synthetic additives**.

At Btsa, we offer TOCOBIOL®, a 100% natural antioxidant based on tocopherols, extracted from non-GMO vegetable oils.

Designed to protect sensitive ingredients from oxidative damage, it's ideal for clean label, plant-based formulations, helping extend shelf life without compromising naturality or transparency.

Tocobiol®

Versatile & reliable performance

- **100% natural solution**
- Suitable for **organic and vegan products**
- Available in **oil-soluble, powder, and custom formats**
- **Heat-stable and versatile** across applications
